VANS FAUTRAS

FAUTRAS® EQUINE FRIENDLY ENTRANCE

By increasing the distance between the horse and trailer, traditional entrance with a ramp makes loading less inviting for the horse.

The Fautras® equine friendly entrance is an American style step in entrance (2 doors and no ramp). It allows the horse to move forward into the trailer without the obstacle of the ramp. Worldwide experience has shown benefits of this system especially for the nervous, young or unconfident horses'.

OBLIC® CONCEPT : Fautras Tech™ partition, diagonal transportation and front exit

The concept of rigid partition deprives the horse of the space they need. The FAUTRAS TECH™ flexible partition gives the horse an improved sense of space.

Diagonal transportation allows the horse to balance itself by spreading its hind legs. The horse comfortably handles any braking, turns, roundabouts...
Finally, the front exit offers an easy access to the horses and a forward unloading with no need to make them turn around: ideal for the large horses.

SIDE OPENING WINDOW

Standard on the Victorious models (available in option on the Oblic+ models), the side opening window is a large side hood giving access to the head of the horses.

Very practical at the time of long ways to feed and water the horses without unloading them. It allows also great ventilation a standstill: the trailer is thus transformed into a proper stable, ideal during competitions.

STORAGE SPACES – on Victorious models only

Thanks to its integrated wheels, the Victorious offers numerous storage spaces: ideal for competitions.

Tack area: An efficient area large enough to store various items tack and equipment, ideal to put bridles, competition jackets, etc. Horse area: in association with the side opening, the side locker allows space for buckets, food, and other essential equipment and to feed the horses thanks to the integrated mangers.

INNOVATIONS

Diagonal Transportation

Why choose the Diagonal transportation range?

"This range certainly is accomplished. Its spaces are astutely used to obtain the best formula between optimized volume for the material, comfort of horses and ease of traction thanks to its aerodynamic shape. I use myself the Oblic+4 every week with 4 selle français: ideal for the competitions..."

Jean Luc Fautras

PERSONALIZATION: Customize your trailer

- Personalised trim
- Personalised logo 300 x 600 mm
- Side opening window
- Rear storage partition
- Spacing Rail with Gas Strut support
- Roof rack & ladder
